A photograph of an offshore oil rig at sea during sunset. The rig is silhouetted against a bright, hazy sky with a low sun. The water is calm and reflects the light from the sky. The rig has a tall derrick with a flame at the top, and various platforms and cranes are visible.

# Energy

## Powerful protection

It is vitally important to reduce risk by ensuring that contractual requirements are scrutinised and indemnities are clearly understood. This is essential in all industries, but none more so than the highly complex oil and gas sector.

KTIB manages insurance portfolios for clients operating across the entire spectrum of the energy market. We understand your needs. This means that we can provide you with the right insurance to give you optimum protection.

We work in partnership with a network of worldwide insurance brokers to ensure the placement of local insurance policies. We can build an umbrella programme for you so that wherever your operations are you can benefit from all available synergies and cost savings.

**"We trust them  
to orchestrate our  
worldwide insurance  
needs in a highly  
complex market"**

*Acteon Group*
